# About the course Graphic organizers in google classroom

Graphic organizers in google classroom course, in this course we will explore the effective use of graphic organizers in Google Classroom to enhance student learning and engagement. Designed for educators, this course will guide you through the process of creating, sharing, and using graphic organizers to facilitate better understanding and retention of information among students. In this course, we will learn about the graphic organizers in Google Classroom, starting with the basics of setting up your classroom and integrating these visual tools into your curriculum. You will discover how to design custom graphic organizers using tools like Google Drawings and Google Slides, and how to assign them as interactive assignments that students can complete and submit online. We will cover various types of graphic organizers, such as mind maps, Venn diagrams, flow charts, and KWL charts, and discuss their specific applications in different subjects and learning activities. The course will also provide strategies for using graphic organizers to support critical thinking, problem-solving, and creative projects. Additionally, you will learn how to provide real-time feedback and assess student submissions, leveraging Google Classroomâ€™s features to streamline communication and evaluation. By the end of this course, you will be equipped with practical skills and knowledge to effectively incorporate graphic organizers into your teaching practices, making lessons more engaging and comprehensible for students. Join us to master the use of graphic organizers in Google Classroom and enhance your educational toolkit.
