About the course Segment Reporting

Example of Business Segment Reporting When compiling the bank's financial statements, its financial officer would be required to separate all three of these divisions in terms of their income items as well as the assets listed on the balance sheet. What is segment financial reporting? Segment reporting is the reporting of the operating segments or units of a company in its financial statements. Segment reporting is required for publicly held entities, but not required for privately held ones.What is segment reporting and its scope? If internal organisational and management structure of an enterprise and its system of internal financial reporting to the board of directors and the chief executive officer are based neither on individual products or services or groups of related products/services nor on geographical areas, paragraph 20(b)
