About the course Routing in Laravel for beginners

Routing in Laravel course, in this course we will learn about the routing in Laravel, the powerful PHP framework. You'll explore how to define routes to handle incoming HTTP requests and map them to controller actions or closures. We'll cover basic routing, route parameters, route model binding, middleware, named routes, route groups, resourceful routing, and advanced topics like API routes and route caching. By the end, you'll have a comprehensive understanding of Laravel's routing system and how to efficiently manage application endpoints.
