Mindluster Platform

About the course Application with AngularJS

AngularJS is a structural framework for dynamic web applications. It lets you use HTML as your template language and lets you extend HTML's syntax to express your application components clearly and succinctly. Its data binding and dependency injection eliminate much of the code you currently have to write.

Programming Category's Courses

Course Lesson(8)

Lesson 1 :
Building an Application with AngularJS Tutorial Introducing Angular Directives | packtpub com

Lesson 2 :
Building an Application with AngularJS Tutorial Introducing the Angular Form | packtpub com
