About the course Data Science projects in Python for Beginners

Data Science projects in Python course, in this course we will learn about various Data Science projects implemented using Python. Participants will gain practical experience in applying Python libraries such as NumPy, Pandas, Matplotlib, and Scikit-learn to real-world data analysis and machine learning tasks. Through hands-on projects and case studies, learners will explore topics like data preprocessing, exploratory data analysis, predictive modeling, and data visualization, equipping them with valuable skills for tackling Data Science challenges using Python.

Computer Science Category's Courses

Course Lesson(4)

Lesson 1 : **Statistics for Data Science Probability and Statistics Statistics Tutorial Ph D Stanford**

Lesson 2 : **Data Science full Course for Beginners in 2022 Python for Data Science Great Learning**

Lesson 3 : **Time Series Analysis Time Series Forecasting Time Series Analysis in R Ph D Stanford**

Lesson 4 : **Data science projects in 2022 Data Science projects in Python Great Learning**
