Mindluster Platform

About the course Python variable techniques for beginners

Python variable techniques course, in this course we will learn about the Python variable techniques essential for efficient programming. From understanding variable types and scopes to mastering advanced manipulation methods, we'll delve into the intricacies of variables in Python. Through practical examples and hands-on exercises, you'll gain the skills needed to leverage variables effectively in your Python projects, enhancing code readability, performance, and maintainability.

Programming Category's Courses

Course Lesson(159)

Lesson 1 : **Profile of the instructor Lesson 01**

Lesson 2 : **Why should you learn Python Lesson 02**

Lesson 3 : **Introduction to Programming Languages Lesson 03**

Lesson 4 : **Downloading Python and Pycharm IDE Lesson 04**

Lesson 5 : **Installing Python and Pycharm IDE Lesson 05**

Lesson 6 : **Setting the Python interpreter for Pycharm Lesson 06**

Lesson 7 : **Your first program in Pycharm Lesson 07**

Lesson 8 : **What are Variables in Python Lesson 08**

Lesson 9 : **Coding Example of variables Lesson 09**

Lesson 10 : **Using type method Lesson 10**

Lesson 11 : **Comments in Python Lesson 11**

Lesson 12 : **Using input method to read values Lesson 12**

Lesson 13 : **Setting the value of environment variable path Lesson 13**

Lesson 14 : **First example program on console Lesson 14**

Lesson 15 : **Second example program on console Lesson 15**

Lesson 16 : **Basics of Strings Lesson 16**

Lesson 17 : **Some String Functions Part 1 Lesson 17**

Lesson 18 : **Some String Functions Part 2 Lesson 18**

Lesson 19 : **Operators in Python Part 1 Lesson 19**

Lesson 20 : **Operators in Python Part 2 Lesson 20**

Lesson 21 : **Basics of List Lesson 21**

Lesson 22 : **Indexing of a List Lesson 22**

Lesson 23 : **Using range in a List Lesson 23**

Lesson 24 : **Using Negative index Lesson 24**

Lesson 25 : **Changing the items of a List Lesson 25**

Lesson 26 : **Adding items into a List Lesson 26**

Lesson 27 : **Deleting items from a List Lesson 27**

Lesson 28 : **Iterating through the List Items Lesson 28**

Lesson 29 : **Basics of Tuples Lesson 29**

Lesson 30 : **Creating and accessing a Tuple Lesson 30**

Lesson 31 : **Immutability of Tuples Lesson 31**

Lesson 32 : **Iterating through a Tuple Lesson 32**

Lesson 33 : **Concatenation of Tuples and Lists Lesson 33**

Lesson 34 : **Deletion of a Tuple Lesson 34**

Lesson 35 : **Using count and index functions Lesson 35**

Lesson 36 : **Unpacking a Tuple Lesson 36**

Lesson 37 : **Membership Test of Tuple Lesson 37**

Lesson 38 : **Basics of Sets Lesson 38**

Lesson 39 : **Creating and accessing Sets Lesson 39**

Lesson 40 : **No Indexing of elements Lesson 40**

Lesson 41 : **Using add and update methods Lesson 41**

Lesson 42 : **Removing items Lesson 42**

Lesson 43 : **Membership test Lesson 43**

Lesson 44 : **Basics of a Dictionary Lesson 44**

Lesson 45 : **Creating a Dictionary and accessing elements Lesson 45**

Lesson 46 : **Iterating through the items of a Dictionary Lesson 46**

Lesson 47 : **Control structures Lesson 47**

Lesson 48 : **Using if statement Lesson 48**

Lesson 49 : **Using else statement Lesson 49**

Lesson 50 : **What is elif ladder Lesson 50**

Lesson 51 : **Using elif statement Part 1 Lesson 51**

Lesson 52 : **Using elif statement Part 2 Lesson 52**

Lesson 53 : **Basics of loops for a loop Lesson 53**

Lesson 54 : **Using for loop Lesson 54**

Lesson 55 : **Using for loop on strings Lesson 55**

Lesson 56 : **continue statement Lesson 56**

Lesson 57 : **range function Lesson 57**

Lesson 58 : **Nested for loops Lesson 58**

Lesson 59 : **using while loop Lesson 59**

Lesson 60 : **Basics of nested loops Lesson 60**

Lesson 61 : **Example of nested loops Lesson 61**

Lesson 62 : **Using break and continue statements with while loop Lesson 62**

Lesson 63 : **Using string modulo operator Lesson 63**

Lesson 64 : **Using string methods to format output Lesson 64**

Lesson 65 : **Using format method Lesson 65**

Lesson 66 : **Basics of Regular expressions Lesson 66**

Lesson 67 : **Example programs Lesson 67**

Lesson 68 : **Some important metacharacters Lesson 68**

Lesson 69 : **Some examples of metacharacter Lesson 69**

Lesson 70 : **Matching alphanumeric Lesson 70**

Lesson 71 : **Matching whitespaces Lesson 71**

Lesson 72 : **Startswith Lesson 72**

Lesson 73 : **Endswith Lesson 73**

Lesson 74 : **Creating a date object displaying current date Lesson 74**

Lesson 75 : **Formatting date objects into strings Part 1 Lesson 75**

Lesson 76 : **Formatting date objects into strings Part 2 Lesson 76**

Lesson 77 : **Formatting date objects into strings Part 3 Lesson 77**

Lesson 78 : **Formatting the time Lesson 78**

Lesson 79 : **Basics of functions Lesson 79**

Lesson 80 : **functions with parameters and parameters Lesson 80**

Lesson 81 : **Default parameter values Lesson 81**

Lesson 82 : **Returning a value from a function Lesson 82**

Lesson 83 : **Variable number of arguments Part 1 Lesson 83**

Lesson 84 : **Variable number of arguments with one or more fixed arguments Lesson 84**

Lesson 85 : **Variable number of KEYWORD arguments Part 1 Lesson 85**

Lesson 86 : **Variable number of KEYWORD arguments Part 2 Lesson 86**

Lesson 87 : **Basics of lambda functions Lesson 87**

Lesson 88 : **Lambda functions as arguments Lesson 88**

Lesson 89 : **Lambda functions in return statement Lesson 89**

Lesson 90 : **Basics of namespaces scope Lesson 90**

Lesson 91 : **Local scope of variables Lesson 91**

Lesson 92 : **Global scope of variables Lesson 92**

Lesson 93 : **Nested functions scope Lesson 93**

Lesson 94 : **Basics of OOPs Lesson 94**

Lesson 95 : **OOPs Features of encapsulation and inheritance Part1 Lesson 95**

Lesson 96 : **OOPs Features of polymorphism and abstraction Part2 Lesson 96**

Lesson 97 : **Relationship of objects and classes Lesson 97**

Lesson 98 : **Writing the first program using a class and object Lesson 98**

Lesson 99 : **Basics of constructors Lesson 99**

Lesson 100 : **Let s consolidate the concepts of constructors and member methods Part 1 Lesson 100**

Lesson 101 : **Let s consolidate the concepts of constructors and member methods Part 2 Lesson 101**

Lesson 102 : **Data hiding Lesson 102**

Lesson 103 : **Function hiding Lesson 103**

Lesson 104 : **Using str function Lesson 104**

Lesson 105 : **Using repr function Lesson 105**

Lesson 106 : **Static attributes Lesson 106**

Lesson 107 : **Modifying properties of an object Lesson 107**

Lesson 108 : **Deleting properties of an object Lesson 108**

Lesson 109 : **Deleting an entire object Lesson 109**

Lesson 110 : **Concept overloading of plus operator Lesson 110**

Lesson 111 : **A practical example of operator overloading Lesson 111**

Lesson 112 : **Overloading comparison operators Lesson 112**

Lesson 113 : **Overloading minus operator Lesson 113**

Lesson 114 : **Overloading of angled bracket and operators Lesson 114**

Lesson 115 : **Basics concept and types of inheritance Lesson 115**

Lesson 116 : **First coding example of inheritance Lesson 116**

Lesson 117 : **Method overriding Part 1 Lesson 117**

Lesson 118 : **Method overriding Part 2 Lesson 118**

Lesson 119 : **Inheritance and non parameterized constructors Lesson 119**

Lesson 120 : **Inheritance and parameterized constructors Lesson 120**

Lesson 121 : **Basics of module Lesson 121**

Lesson 122 : **Example code of Modules Part 1 Lesson 122**

Lesson 123 : **Example code of Modules Part 2 Lesson 123**

Lesson 124 : **Using the class of a module Lesson 124**

Lesson 125 : **Alias name to a module Lesson 125**

Lesson 126 : **Basics of exception handling Lesson 126**

Lesson 127 : **How to handle exceptions example of ZeroDivisionError exception Lesson 127**

Lesson 128 : **Example of NameError exception Lesson 128**

Lesson 129 : **Example of ValueError exception Lesson 129**

Lesson 130 : **Example of ImportError exception Lesson 130**

Lesson 131 : **Example of KeyboardInterrupt exception Lesson 131**

Lesson 132 : **Example of IndexError exception Lesson 132**

Lesson 133 : **Multiple exception handlers under one try Lesson 133**

Lesson 134 : **Calling a function from within try block Lesson 134**

Lesson 135 : **Except exception handler The base of all exceptions Lesson 135**

Lesson 136 : **finally Lesson 136**

Lesson 137 : **Defining custom exceptions Lesson 137**

Lesson 138 : **Basics of file handling Lesson 138**

Lesson 139 : **Reading the data from a text file with one single go Lesson 139**

Lesson 140 : **Reading the data from a text file character by character Lesson 140**

Lesson 141 : **Reading the data from text file line by line Lesson 141**

Lesson 142 : **Opening the file in append and write modes Lesson 142**

Lesson 143 : **Using the w mode for reading and writing Part 1 Lesson 143**

Lesson 144 : **Using the w mode for reading and writing Part 2 Lesson 144**

Lesson 145 : **Deleting a file Lesson 145**

Lesson 146 : **Renaming a file Lesson 146**

Lesson 147 : **Basics of databases Lesson 147**

Lesson 148 : **Installing MySql and creating a database Lesson 148**

Lesson 149 : **Learning the SQL statements Create statement Lesson 149**

Lesson 150 : **Learning the SQL statements select statement Lesson 150**

Lesson 151 : **Learning he SQL statements insert statement Lesson 151**

Lesson 152 : **connecting Mysql with Python code Lesson 152**

Lesson 153 : **Issuing Select query in Python code Lesson 153**

Lesson 154 : **Retrieving column by column Lesson 154**

Lesson 155 : **Issuing Create table query in Python code Lesson 155**

Lesson 156 : **Inserting records into a table Lesson 156**

Lesson 157 : **Dynamic insertion of records Lesson 157**

Lesson 158 : **Issuing update query in Python script Lesson 158**

Lesson 159 : **Issuing delete query in Python script Lesson 159**
