Mindluster Platform

About the course Pointers in C

A pointer is a variable that stores the memory address of an object. Pointers are used extensively in both C and C++ for three main purposes: to allocate new objects on the heap, to pass functions to other functions .

Programming Category's Courses

Course Lesson(7)

Lesson 1 : **C Pointers Introduction**

Lesson 2 : **C Pointers Pointer Memory**

Lesson 3 : **C Pointers Pointer to Pointer**

Lesson 4 : **C Pointers Dereferencing Pointers**

Lesson 5 : **C Pointers Pointers and Arrays**

Lesson 6 : **C Pointers Character Pointers | Must Watch**

Lesson 7 : **C Pointers Dynamic Memory | Stack vs Heap**
