Mindluster Platform

About the course Engineering Hydrology basics for Beginners

Engineering Hydrology basics course, In this course we'll explore fundamental concepts of Engineering Hydrology, covering water cycle, precipitation, and runoff processes.

Engineering Category's Courses

Course Lesson(84)

Lesson 1 : **Engineering Hydrology Intro Video**

Lesson 2 : **Lec 1 Course contents**

Lesson 3 : **Lec 2 Preliminary Concepts**

Lesson 4 : **Lec 3 Introduction to Reynolds Transport Theorem**

Lesson 5 : **Lec 4 Derivation of Reynolds Transport Theorem Part I**

Lesson 6 : **Lec 5 Derivation of Reynolds Transport Theorem Part II**

Lesson 7 : **Lec 6 Conservations Laws**

Lesson 8 : **Lec 8 Summary of Module 1**

Lesson 9 : **Lec 9 Atmospheric Water**

Lesson 10 : **Lec 10 Water Vapor Dynamics**

Lesson 11 : **Lec 11 Precipitable Water in the Static Atmospheric Column**

Lesson 12 : **Lec 12 Numerical Examples on Basic Atmospheric Parameters**

Lesson 13 : **Lec 13 Precipitation Types and Formation**

Lesson 14 : **Lec 14 Terminal Velocity**

Lesson 15 : **Lec 15 Thunderstorm Cell Model**

Lesson 16 : **Lec 16 Numerical Examples on Terminal Velocity and Thunderstorm Cell**

Lesson 17 : **Lec 17 Forms of Precipitation**

Lesson 18 : **Lec 18 Measurement of rainfall**

Lesson 19 : **Lec 20 Presentation of Rainfall Data**

Lesson 20 : **Lec 21 Analysis of Rainfall Data**

Lesson 21 : **Lec 22 Average Areal Rainfall**

Lesson 22 : **Lec 23 Evaporation**

Lesson 23 : **Lec 24 Evaporation Energy Balance Method**

Lesson 24 : **Lec 25 Evaporation Aerodynamic Method**

Lesson 25 : **Lec 26 Evaporation Combined Method**

Lesson 26 : **Lec 27 Numerical Examples on Evaporation**

Lesson 27 : **Lec 28 Evaporation Empirical method**

Lesson 28 : **Lec 29 Evapotranspiration**

Lesson 29 : **Lec 30 Evapotranspiration Numerical Example**

Lesson 30 : **Lec 31 Summaryof Module 2**

Lesson 31 : **Lec 32 Subsurface Water**

Lesson 32 : **Lec 33 1 D Unsteady Unsaturated Flow Equation**

Lesson 33 : **Lec 34 Infiltration**

Lesson 34 : **Lec 35 Measurement of Infiltration**

Lesson 35 : **Lec 36 Estimation of Infiltration Empirical Equations**

Lesson 36 : **Lec 37 Numerical examples Infiltration estimation using empirical equations**

Lesson 37 : **Lec 38 Estimation of Infiltration Theoretical Equation**

Lesson 38 : **Lec 39 Infiltration Green Ampt Equation**

Lesson 39 : **Lec 40 Ponding time**

Lesson 40 : **Lec 42 Summary Module III**

Lesson 41 : **Lec 43 Surface Water**

Lesson 42 : **Lec 44 Excess Rainfall and Direct Runoff**

Lesson 43 : **Lec 45 Numerical Examples on Direct Runoff**

Lesson 44 : **Lec 46 Overland flow**

Lesson 45 : **Lec 47 Streamflow Measurement I**

Lesson 46 : **Lec 48 Streamflow Measurement II**

Lesson 47 : **Lec 49 Representation of Streamflow**

Lesson 48 : **Lec 50 Numerical Examples on Streamflow Measurement**

Lesson 49 : **Lec 51 Summary of Module IV**

Lesson 50 : **Lec 52 Hydrologic Analysis Introduction**

Lesson 51 : **Lec 53 Linear System Theory**

Lesson 52 : **Lec 54 Hydrograph Analysis UH**

Lesson 53 : **Lec 55 Hydrograph Analysis DRH**

Lesson 54 : **Lec 56 Numerical examples on UH and DRH**

Lesson 55 : **Lec 57 S Hydrograph**

Lesson 56 : **Lec 58 Unit Hydrograph of Different Duration**

Lesson 57 : **Lec 59 Numerical examples UH of Different Duration**

Lesson 58 : **Lec 60 Instantaneous Unit Hydrograph**

Lesson 59 : **Lec 61 Instantaneous Unit Hydrograph Nash s Model**

Lesson 60 : **Lec 62 Numerical Examples on IUH**

Lesson 61 : **Lec 63 Synthetic Unit Hydrograph**

Lesson 62 : **Lec 64 SCS Synthetic Unit Hydrograph**

Lesson 63 : **Lec 65 Numerical Examples on SUH**

Lesson 64 : **Lec 66 Hydrograph Routing**

Lesson 65 : **Lec 67 Reservoir Routing**

Lesson 66 : **Lec 68 Numerical Example on Reservoir Routing**

Lesson 67 : **Lec 69 Hydrologic Channel Routing**

Lesson 68 : **Lec 70 Numerical Examples on Channel Routing**

Lesson 69 : **Lec 71 Summary of Module V**

Lesson 70 : **Lec 72 Hydrologic Statistics Preliminary Concepts**

Lesson 71 : **Lec 73 Probability Distribution and Basic Descriptive Statistics**

Lesson 72 : **Lec 74 Probabiity Distributions**

Lesson 73 : **Lec 75 Frequency Analysis**

Lesson 74 : **Lec 76 Exreme Value Analysis**

Lesson 75 : **Lec 77 Summary of Module VI**

Lesson 76 : **Lec 78 Hydrologic Design**

Lesson 77 : **Lec 79 Numerical examples on probability and risk**

Lesson 78 : **Lec 80 Design Storm**

Lesson 79 : **Lec 81 Design Flood**

Lesson 80 : **Lec 82 Summary of Module VII**

Lesson 81 : **Lec 83 Closure of Engineering Hydrology**

Lesson 82 : **Lec 19 Raingauge Network**

Lesson 83 : **Lec 7 Numerical Examples**

Lesson 84 : **Lec 41 Numerical Examples on Green Ampt Infiltration Equation**
