Mindluster Platform

About the course Power Electronic Converters

Power Electronic Converters course, in this course Learn about the fundamentals and applications of Power Electronic Converters in this course.

Engineering Category's Courses

Course Lesson(71)

Lesson 1 : **Design of Power Electronic Converters Intro Video**

Lesson 2 : **Lec 1 Introduction**

Lesson 3 : **Lec 2 Analysis of Buck Converter**

Lesson 4 : **Lec 3 Choosing L and C**

Lesson 5 : **Lec 4 Design Example of Buck Converter**

Lesson 6 : **Lec 5 Analysis of H Bridge**

Lesson 7 : **Lec 6 Bipolar PWM**

Lesson 8 : **Lec 7 Unipolar PWM**

Lesson 9 : **Lec 8 Bipolar vs Unipolar PWM**

Lesson 10 : **Lec 9 Different types of power diode**

Lesson 11 : **Lec 10 Diode characteristics**

Lesson 12 : **Lec 11 Diode Datasheets**

Lesson 13 : **Lec 12 Diode Datasheet Examples**

Lesson 14 : **Lec 13 MOSFET**

Lesson 15 : **Lec 14 Switching characteristics of MOSFET**

Lesson 16 : **Lec 15 MOSFET Datasheets I**

Lesson 17 : **Lec 16 MOSFET Datasheets II**

Lesson 18 : **Lec 17 MOSFET Datasheet example**

Lesson 19 : **Lec 18 IGBT**

Lesson 20 : **Lec 19 IGBT Datasheets I**

Lesson 21 : **Lec 20 IGBT Datasheets II**

Lesson 22 : **Lec 21 IGBT Datasheet Example**

Lesson 23 : **Lec 22 Introduction to Gate Drivers**

Lesson 24 : Lec 23 Gate Driver Requirements

Lesson 25 : Lec 24 Optocouplers based Gate Drivers I

Lesson 26 : Lec 25 Optocouplers based Gate Drivers II

Lesson 27 : Lec 26 Desat Protection

Lesson 28 : Lec 27 Bootstrapping

Lesson 29 : Lec 28 Pulse Transformer based Gate Drivers

Lesson 30 : Lec 29 Gate Drivers Few Other Requirements

Lesson 31 : Lec 30 Introduction to Snubbers

Lesson 32 : Lec 31 RC Snubber Analysis I

Lesson 33 : Lec 32 RC Snubber Analysis II Underdamped Case

Lesson 34 : Lec 33 RC Snubber Analysis III Overdamped and Critically Damped Case

Lesson 35 : Lec 34 RC Snubber Design I

Lesson 36 : Lec 35 RC Snubber Design II

Lesson 37 : Lec 36 RCD Snubbers I

Lesson 38 : Lec 37 RCD Snubbers II

Lesson 39 : Lec 38 Power Loss I

Lesson 40 : Lec 39 Power Loss II

Lesson 41 : Lec 40 Thermal Modelling I

Lesson 42 : Lec 41 Thermal Modelling II

Lesson 43 : Lec 42 Thermal Modelling III

Lesson 44 : Lec 43 Choosing Heat Sinks

Lesson 45 : Lec 44 Fundamentals

Lesson 46 : Lec 45 Magnetic Losses

Lesson 47 : Lec 46 Conductors

Lesson 48 : Lec 47 Magnetic Materials

Lesson 49 : Lec 48 Magnetic Core

Lesson 50 : Lec 49 Inductor Design I

Lesson 51 : Lec 50 Inductor Design II

Lesson 52 : Lec 51 Transformer Design

Lesson 53 : Lec 52 Inductor Design Example

Lesson 54 : Lec 53 Example of Transformer Design

Lesson 55 : Lec 54 Introduction to EMI

Lesson 56 : Lec 55 EMI Measurements

Lesson 57 : Lec 56 EMI in Power Electronics

Lesson 58 : **Lec 57 CM and DM noise**

Lesson 59 : **Lec 58 Design Solutions of EMI**

Lesson 60 : **Lec 59 EMI Filter I**

Lesson 61 : **Lec 60 EMI Filter II**

Lesson 62 : **Lec 61 Sections of Power Converters**

Lesson 63 : **Lec 62 Capacitors**

Lesson 64 : **Lec 63 Familiarity with Components I**

Lesson 65 : **Lec 64 Familiarity with Components II**

Lesson 66 : **Lec 65 PCB I**

Lesson 67 : **Lec 66 PCB II**

Lesson 68 : **Lec 67 PCB III**

Lesson 69 : **Lec 68 Grounds**

Lesson 70 : **Lec 69 Lab Demo of Hardware Design**

Lesson 71 : **Tutorial PCB Designing**
