About the course Comparison of equity and preference shares

Comparison of equity and preference shares course, in this course offers an in-depth exploration of the key differences and similarities between equity and preference shares, helping learners understand their unique features and roles in corporate finance. Youâ€™ll learn about the voting rights and ownership benefits of equity shares compared to the fixed dividends and priority claims of preference shares. The course covers topics such as dividend policies, risk levels, market behavior, and investor considerations for each share type. Through practical examples and case studies, youâ€™ll gain insights into how companies use these shares for financing and how investors choose between them based on goals and risk tolerance. Ideal for finance students, professionals, and aspiring investors, this course provides the knowledge needed to make informed decisions about equity and preference shares in the dynamic world of business.
