Mindluster Platform

About the course 3D Modeling in autoCAD for beginners

3D Modeling in autoCAD, in this course provides a comprehensive introduction to 3D modeling in AutoCAD, equipping you with the skills to create detailed and accurate 3D designs. Learn to use essential tools like Extrude, Revolve, Sweep, and Loft to transform 2D sketches into complex 3D objects. Explore techniques for editing models, adding materials, and applying textures to enhance visual realism. Gain expertise in managing layers, viewports, and coordinate systems to streamline your workflow. The course also covers 3D rendering, lighting, and exporting models for presentations or manufacturing. Through hands-on projects, youâ€™ll develop a strong foundation in 3D design, making it ideal for architects, engineers, and designers looking to elevate their AutoCAD skills. Whether you're a beginner or enhancing your knowledge, this course ensures you can confidently create professional 3D models in AutoCAD.

Engineering Category's Courses

Course Lesson(7)

Lesson 1 : **Autocad 3D Complete Tutorial for Beginners Part 1**

Lesson 2 : **Autocad 3D Complete Tutorial for Beginners Part 2**

Lesson 3 : **Autocad 3D Complete Tutorial for Beginners Part 3**

Lesson 4 : **Autocad 3D 4 Practice Exercises step by step**

Lesson 5 : **AutoCAD 3D Basics Tutorial to model a floor plan fast and effective PART 1**

Lesson 6 : **AutoCAD 3D Basics Tutorial to model a floor plan fast and effective PART 2**

Lesson 7 : **AutoCAD 3D Basics Tutorial to model a floor plan fast and effective PART 3 Roof**
