About the course Big data analytics for beginners

Course Presenter : Great Learning

Big data analytics for beginners, in this course we will learn about Big Data Analytics for Beginners, starting with the fundamental concepts, tools, and techniques used to process large datasets. Youâ€™ll explore data collection, storage, and analysis while understanding how businesses leverage big data for decision-making. The course covers data mining, machine learning basics, and predictive analytics, providing hands-on experience with industry-standard tools. By the end, you'll grasp how big data transforms industries and develop the skills needed to analyze and interpret complex datasets. Ideal for beginners, this course is your gateway to the world of data analytics. Great Learning

Computer Science Category's Courses

Course Lesson(8)

Lesson 1 :
What is Big Data and Why it is Important Big Data Analytics Internet of Things Great Learning

Lesson 2 :
Introduction to Big data Introduction to Hadoop Framework What is MapReduce Great Learning

Lesson 3 :
Big Data Tutorial Big Data Analytics Big Data Hadoop Tutorial for Beginners Great Learning

Lesson 4 :
Big Data Analytics for Beginners Big Data Tutorial in 2021 Learn Big Data Great Learning

Lesson 5 : **Art of Big Data Analytics Understanding the Big Data Landscape in India Great Learning**

Lesson 6 :
Hadoop Tutorial for Beginners Hadoop Tutorial Big Data Hadoop Tutorial for Beginners Hadoop

Lesson 7 :
Big Data Hadoop Tutorial For Beginners Hadoop Training Big Data Training Great Learning

Lesson 8 :
Application of Big Data and Machine Learning in Internet of Things AI and Big Data in IoT
