About the course Intrinio python API

Course Presenter : Financial Programming with Ritvik CFA

Intrinio python API, in this course Start your journey with the Intrinio Python API course and learn how to connect Python with real-time and historical financial data using the Intrinio SDK. In this course, you'll explore how to retrieve stock prices, analyze financial statements, pull options and economic data, and build custom analytics tools. We'll guide you step by step to install the SDK, configure your API key, and make live data requests using Python. Whether you're a beginner in finance, a data analyst, or a developer building a trading app, this course provides you with the knowledge to access, analyze, and visualize financial data efficiently. Dive into practical projects that cover securities, fundamentals, and technical indicatorsâ€”all with simple code examples. No prior API or finance experience neededâ€”just basic Python skills. Unlock the power of data-driven finance today with Intrinio and Python. Financial Programming with Ritvik CFA

Programming Category's Courses
