About the course Types of feasibility study

Course Presenter : Commerce lectures

Types of feasibility study, in this course we will learn about the main types of feasibility studies that help determine whether a proposed idea is viable and sustainable. You'll gain a clear understanding of financial feasibility, which examines costs, revenues, and profitability; technical feasibility, which assesses technology, equipment, and resources; market feasibility, which analyzes demand, competition, and target customers; legal feasibility, which checks compliance with laws and regulations; and operational feasibility, which looks at the internal capacity to implement the project. Each type will be explained with examples, tools, and practical applications. This course is ideal for entrepreneurs, business students, and project managers looking to make informed decisions and minimize risk. Join now to learn how to evaluate any idea through the lens of structured feasibility analysis. Commerce lectures
