About the course MongoDB aggregation Pipelines

MongoDB aggregation course, in this course you will delve into the powerful world of MongoDB aggregation. Explore advanced techniques and keywords to harness the full potential of MongoDB's aggregation framework. Uncover the secrets of data transformation, filtering, and computation, all while gaining valuable insights into how to optimize your queries for efficient data manipulation. Elevate your MongoDB skills and make the most of your data with this comprehensive course.

Computer Science Category's Courses

Course Lesson(7)

Lesson 1 : **Learn Mongodb aggregation Pipelines setup**

Lesson 2 : **Grouping in mongodb**

Lesson 3 : **Group sum and more MongoDB aggregation**

Lesson 4 : **Dealing with arrays in aggregation**

Lesson 5 : **Match and project pipeline**

Lesson 6 : **Match all operators of aggregation**

Lesson 7 : **Lookup in Mongodb aggregation**
