Mindluster Platform

About the course MongoDB Connector Essentials for beginners

MongoDB Connector course in hindi, in this course explore the MongoDB Connector and its capabilities. Learn how to seamlessly integrate MongoDB with other systems and search engines like Elasticsearch and Solr. Discover data synchronization techniques, real-time data transfer, and best practices for leveraging the MongoDB Connector to enhance data management and search functionalities in your applications.

Computer Science Category's Courses

Course Lesson(23)

Lesson 1 : **How to install Docker and Hello World**

Lesson 2 : **What is a container in Docker**

Lesson 3 : **Docker vs Virtual Machine**

Lesson 4 : **Our First interaction with busy box image**

Lesson 5 : **Getting a MongoDB container for fun Docker**

Lesson 6 : **Exploring exec command Docker**

Lesson 7 : **Multiple ways to get inside a container**

Lesson 8 : **An analogy for custom docker image**

Lesson 9 : **Our first base image and custom image**

Lesson 10 : **Behind the scene for custom image**

Lesson 11 : **Creating a custom mongodb image**

Lesson 12 : **Concept of caching in docker**

Lesson 13 : **Provide a custom name for your image**

Lesson 14 : **Introduction to node project for docker**

Lesson 15 : **Introduction to node project for docker part 2 Docker**

Lesson 16 : **Containerize a node application Docker**

Lesson 17 : **Performance upgrade in node project container Docker**

Lesson 18 : **Introduction to multi docker container Docker**

Lesson 19 : **A mini mongo connector project Docker**

Lesson 20 : **Put your node code in a container Docker**

Lesson 21 : **Introduction to docker compose Docker**

Lesson 22 : **Connect 2 compose images in docker Docker**

Lesson 23 : **Access the compose container app with browser Docker**
