Mindluster Platform

About the course Python For Beginners

Python is commonly used for developing websites and software, task automation, data analysis, and data visualization. Since it's relatively easy to learn, Python has been adopted by many non-programmers such as accountants and scientists, for a variety of everyday tasks, like organizing finances.

Programming Category's Courses

Course Lesson(27)

Lesson 1 : **1 Introduction to the course Learn Python**

Lesson 2 : **2 A few words about Python**

Lesson 3 : **3 Installing Python via Anaconda**

Lesson 4 : **5 Spyder and iPython**

Lesson 5 : **6 Variables in Python**

Lesson 6 : **7 How to save your code**

Lesson 7 : **8 Strings and numbers in Python**

Lesson 8 : **9 If else and indentation in Python**

Lesson 9 : **10 Functions in Python**

Lesson 10 : **11 Sequences in Python**

Lesson 11 : **11 1 Sequences in Python**

Lesson 12 : **12 Collections in Python**

Lesson 13 : **13 Working with sequences and strings in Python**

Lesson 14 : **14 Iterating in Python**

Lesson 15 : **15 Working with files in Python**

Lesson 16 : **16 Handling files easily in Python**

Lesson 17 : **17 Finding and using any library you want in Python**

Lesson 18 : **18 Real world example Extracting averages from data files in Python**

Lesson 19 : **19 Code introspection in Python**

Lesson 20 : **20 Real world example Generating KML files in Python**

Lesson 21 : **21 Interacting with the user in Python**

Lesson 22 : **22 Converting CSV data to a KML file in Python**

Lesson 23 : **23 Global variables in Python**

Lesson 24 : **24 Creating a GUI with tkinter in Python**

Lesson 25 : **25 Attaching the GUI to your script in Python**

Lesson 26 : **26 Creating standalone executables out of your Python programs**

Lesson 27 : **4 Installing Python the default way**
