About the course Vuetify

Vuetify is an open source MIT project for building user interfaces for web and mobile applications. It is a project that is backed by sponsors and volunteers from the Vue community. The project is supported by a vibrant Discord community forum where you can ask JavaScript questions â€” even if they're not about Vuetify.Vuetify can be added by installing the Nuxt Vuetify module. Once installed, update your nuxt.config.js file to include the Vuetify module in the build.js is probably the best choice. Vuetify is a reusable semantic component framework for Vue. js that aims to provide clean, semantic and reusable components. It supports all the modern browsers and is compatible with Vue CLI-3.VuetifyJs is a great Material Design Framework for VueJs. It comes with a ton of ready to use components. A â€œhidden championâ€ is the build in responsive system.What is Vuetify? Vuetify is a complete UI framework built on top of Vue. ... Unlike other frameworks, Vuetify is designed from the ground up to be easy to learn and rewarding to master with hundreds of carefully crafted components from the Material Design specificatio
