Mindluster Platform

About the course JavaScript Promises methods

Promises are a way to implement async programming in JavaScript(ES6). A Promise will become a container for future value. Like if you order any food on any site to deliver it to your place that order record will be the promise and the food will be the value of that promise .

Programming Category's Courses

Course Lesson(17)

Lesson 1 : **JavaScript ES6 Promises Basic Syntax**

Lesson 2 : **More About JavaScript ES6 Promises methods**

Lesson 3 : **JavaScript Promises all Method**

Lesson 4 : **JavaScript Promise race method**

Lesson 5 : **Fetch in Under Five**

Lesson 6 : **Understanding Synchronous vs Asynchronous JavaScript**

Lesson 7 : **Using Promise all to Load Multiple Files**

Lesson 8 : **Combining fetch and the Promise all Method**

Lesson 9 : **Combining Async Await with Promises**

Lesson 10 : **Build an Autocomplete Input with Debounce**

Lesson 11 : **NEW Web Share API**

Lesson 12 : **Error Handling in Promises**

Lesson 13 : **Practical Uses for Promise finally**

Lesson 14 : **Promises and the allSettled Method**

Lesson 15 : **The new Promise any method**

Lesson 16 : **An Alternate Fetch Syntax**

Lesson 17 : **Converting Callback Functions to Promises**
