About the course JWT Authentication in Web Applications

JWT Authentication course, in this course we will learn about the JWT authentication method, which leverages JSON Web Tokens to authenticate users in web applications. Exploring the fundamentals of JWT structure and token generation, we'll delve into implementing JWT authentication mechanisms securely. Through practical examples and hands-on exercises, you'll gain expertise in validating and verifying JWT tokens, customizing authentication middleware, and handling token refreshment. By the end, you'll be equipped with the skills to integrate JWT authentication seamlessly into your web applications while adhering to best security practices.

Web Design Category's Courses

Course Lesson(12)

Lesson 1 : **What Is JWT and Why Should You Use JWT**

Lesson 2 : **Node js Passport Login System Tutorial**

Lesson 3 : **JWT Authentication Tutorial Node js**

Lesson 4 : **JavaScript Cookies vs Local Storage vs Session Storage**

Lesson 5 : **Learn CORS In 6 Minutes**
