Mindluster Platform

About the course Feature Engineering Python

python allows engineers to implement open source SCADA (Supervisory Control and Data Acquisition) systems that can perfectly sync an industrial project. The coding language can handle large data sets that engineers can develop algorithms around, to meet the ends they require for their setups .

Programming Category's Courses

Course Lesson(4)

Lesson 1 : **What is feature engineering | Feature Engineering Tutorial Python 1**

Lesson 2 : **Outlier detection and removal using percentile | Feature engineering tutorial python 2**

Lesson 3 :
Outlier detection and removal z score standard deviation | Feature engineering tutorial python 3

Lesson 4 : **Outlier detection and removal using IQR | Feature engineering tutorial python 4**
