About the course PAGINATION EN PHP

Paging means showing your query result in multiple pages instead of just put them all in one long page. MySQL helps to generate paging by using LIMIT clause which will take two arguments. First argument as OFFSET and second argument how many records should be returned from the database.

Programming Category's Courses

Course Lesson(3)

Lesson 1 : **PAGINATION EN PHP Partie 1**

Lesson 2 : **PAGINATION EN PHP Partie 2**

Lesson 3 : **PAGINATION EN PHP Partie 3 et FIN**
