About the course Animal Signs in American Sign Language

Animal Signs course, in this course we will delve into the fascinating world of animal signs within American Sign Language (ASL). Students will explore a variety of signs representing different animals, learning their gestures, facial expressions, and body movements to accurately convey their identities in ASL. Through interactive activities and practice sessions, participants will develop proficiency in using animal signs in both casual conversation and more formal settings. Additionally, cultural and historical aspects of animal signs within the Deaf community will be discussed, providing students with a comprehensive understanding of their significance in ASL communication.
