About the course Technical Signing in American Sign Language

Technical Signing course, in this course we will delve into the intricacies of Technical Signing, focusing on the specialized vocabulary and concepts used in technical and scientific fields. Participants will learn to effectively communicate complex technical information using American Sign Language (ASL). Through interactive lessons and practical exercises, students will develop proficiency in signing technical terms related to engineering, information technology, medical sciences, computing, and the arts. This course aims to equip learners with the skills necessary to navigate technical environments confidently and facilitate clear communication within technical communities using ASL.
