Mindluster Platform

About the course Javascript Objects and Prototypes

Every object in JavaScript has a built-in property, which is called its prototype. The prototype is itself an object, so the prototype will have its own prototype, making what's called a prototype chain. The chain ends when we reach a prototype that has null for its own prototype

Programming Category's Courses

Course Lesson(9)

Lesson 1 :
Javascript Object and Prototypes Tutorial for beginners in HINDI | ENGLISH 1 Javascript Data types

Lesson 2 :
Javascript Object and Prototypes Tutorial for beginners in HINDI |ENGLISH 2 Basics of Object Part 1

Lesson 3 :
Javascript Object and Prototypes Tutorial for beginners in HINDI|ENGLISH 3 Basics of Object Part 2

Lesson 4 :
Javascript Object and Prototypes Tutorial for beginners in HINDI | ENGLISH 4 Function Constructor

Lesson 5 :
Javascript Object and Prototypes Tutorial for beginners in HINDI | ENGLISH 5 this keyword

Lesson 6 :
Javascript Object and Prototypes Tutorial for beginners in HINDI | ENGLISH 6 Objects and basics

Lesson 7 :
Javascript Object and Prototypes Tutorial for beginners in HINDI | ENGLISH 7 Prototype proto

Lesson 8 :
Javascript Object and Prototypes Tutorial for beginners in HINDI | ENGLISH 8 Property Lookup

Lesson 9 :
Javascript Object and Prototypes Tutorial for beginners in HINDI | ENGLISH 9 JS inheritance basics
