Mindluster Platform

About the course JavaScript Promises

The Promise object supports two properties: state and result. While a Promise object is "pending" (working), the result is undefined. When a Promise object is "fulfilled", the result is a value. When a Promise object is "rejected", the result is an error object.

Programming Category's Courses

Course Lesson(11)

Lesson 1 : **1 1 Course Introduction**

Lesson 2 : **1 2 Callbacks vs Promises**

Lesson 3 : **1 3 Callbacks vs Thens**

Lesson 4 : **Course Map**

Lesson 5 : **1 5 Promise Timeline**

Lesson 6 : **Syntax**

Lesson 7 : **Web Technologies**

Lesson 8 : **What Happens Next**

Lesson 9 : **2 2 Error Handling Strategies**

Lesson 10 : **Array Methods and Promises**

Lesson 11 : **Course Outro**
