About the course Major Depressive Disorder Treatment

Major Depressive Disorder course, in this course we will explore Major Depressive Disorder, covering its symptoms, risk factors, diagnostic criteria, and treatment options. Through lectures, case studies, and discussions, students will gain insights into the underlying neurobiological mechanisms of MDD, the impact of environmental and genetic factors, and the various therapeutic approaches, including psychotherapy, pharmacotherapy, and lifestyle interventions. Additionally, we will discuss the importance of early detection, suicide prevention strategies, and the role of social support in managing Major Depressive Disorder effectively.
