About the course Nephritic Syndrome Treatment

Nephritic Syndrome course, in this course delves into a group of kidney disorders characterized by glomerular inflammation leading to hematuria, proteinuria, and decreased glomerular filtration rate. Students will explore the various etiologies, clinical manifestations, diagnostic criteria, and treatment approaches for Nephritic Syndrome. Through lectures and case studies, learners will gain insights into the pathophysiology underlying this syndrome, the differential diagnosis process, and the management strategies aimed at preserving kidney function and preventing complications such as chronic kidney disease. Additionally, we'll discuss the role of immunosuppressive therapy and supportive measures in managing Nephritic Syndrome effectively.

Medical Category's Courses

Course Lesson(11)

Lesson 1 : **Acute Kidney Injury AKI Acute Renal Failure Diagnosis Causes and Treatment**

Lesson 2 : **Nephritic Syndrome Clinical Presentation Causes and Treatment**

Lesson 3 : **Acute Tubular Necrosis ATN Symptoms Causes and Treatments**

Lesson 4 : **Nephrotic Syndrome Clinical Presentation Causes and Treatment**

Lesson 5 : **Kidney Renal Disease Signs Symptoms ex Peripheral Edema Fatigue Itchiness**

Lesson 6 : **Acute Interstitial Nephritis AIN Causes Pathophysiology Symptoms Diagnosis Treatment**

Lesson 7 :
Pyelonephritis Kidney Infection Causes Pathophysiology Signs Symptoms Diagnosis Treatment

Lesson 8 : **Kidney Stones Nephrolithiasis Signs Symptoms Why They Occur**

Lesson 9 :
Urinary Incontinence Stress Urge Overflow Functional Causes Symptoms Diagnosis Treatment

Lesson 10 : **Kidney Infection Pyelonephritis Signs Symptoms Why They Occur**

Lesson 11 : **Epididymitis Scrotal Pain Signs Symptoms Why They Occur**
