About the course Haemochromatosis Diagnosis

Haemochromatosis course, in this course we will learn about Haemochromatosis, a genetic disorder characterized by excessive iron absorption and deposition in various organs, particularly the liver, pancreas, heart, and joints. Exploring its pathophysiology, clinical manifestations, and diagnostic criteria, we'll delve into management strategies including phlebotomy, iron chelation therapy, and dietary modifications. Additionally, we'll discuss complications such as liver cirrhosis, diabetes mellitus, and arthropathy, along with genetic counseling and screening recommendations. Understanding Haemochromatosis is essential for healthcare professionals to facilitate early detection and effective management of this potentially debilitating condition.

Medical Category's Courses

Course Lesson(15)

Lesson 1 : **Primary Sclerosing Cholangitis Visual Explanation for Students**

Lesson 2 : **Understanding Haemochromatosis**

Lesson 3 : **Understanding Wilson s Disease**

Lesson 4 : **Understanding Hepatitis B Serology Results**

Lesson 5 : **Understanding Stomach and Duodenal Ulcers**

Lesson 6 : **Hirschsprung s Disease**

Lesson 7 : **Understanding Pernicious Anaemia B12 Deficiency**

Lesson 8 : **Understanding Coeliac Disease**

Lesson 9 : **Understanding Ileus Paralytic Ileus**

Lesson 10 : **Understanding Volvulus Twisted Bowel**

Lesson 11 : **Understanding Intussusception**

Lesson 12 : **Understanding Cholangiocarcinoma**

Lesson 13 : **Understanding the Causes of Blood in Stool Rectal Bleeding**

Lesson 14 : **Stages of Non Alcoholic Fatty Liver Disease medicine gastroenterology**

Lesson 15 : **Understanding Non Alcoholic Fatty Liver Disease**
