About the course Anti D in Pregnancy for Women

Anti-D in Pregnancy course, in this course we will learn about the management of Rh-negative pregnancies and the prevention of Rh isoimmunization. Exploring topics such as Rh incompatibility, hemolytic disease of the newborn, and screening for anti-D antibodies, we'll discuss the administration of Rh immunoglobulin prophylaxis, monitoring strategies, and interventions for sensitized pregnancies. Additionally, we'll review complications, advancements in therapy, and current research in the field of Anti-D in pregnancy to optimize maternal and fetal outcomes.
