About the course Blood Glucose Regulation and Diabetes

Blood Glucose Regulation course, in this course we will explore the intricate mechanisms by which the body maintains optimal blood glucose levels. Delving into the roles of insulin, glucagon, and other hormones, we'll examine how glucose is regulated in various metabolic states. Understanding these processes is crucial for managing conditions like diabetes mellitus and hypoglycemia. Additionally, we'll discuss the impact of diet, exercise, and medication on blood glucose levels, empowering learners to make informed decisions for their health and well-being.

Medical Category's Courses

Course Lesson(14)

Lesson 1 : **What causes Cushings Syndrome**

Lesson 2 : **Understanding The Dexamethasone Suppression Test**

Lesson 3 : **Blood Glucose Regulation and Diabetes**

Lesson 4 : **How does sitagliptin work DPP 4 inhibitors and GLP 1 mimetics**

Lesson 5 : **Understanding the Short Synacthen Test**

Lesson 6 : **How do GnRH analogues work Zoladex Prostap and other GnRH analogues**

Lesson 7 : **Understanding the Menstrual Cycle**

Lesson 8 : **Hypothyroidism and Hashimoto s Thyroiditis Visual Explanation for Students**

Lesson 9 : **Understanding Bitemporal Hemianopia**

Lesson 10 : **Understanding Hyperparathyroidism**

Lesson 11 : **Hyperaldosteronism and Conn s Syndrome**

Lesson 12 : **Understanding Acromegaly**

Lesson 13 : **Understanding Diabetes Insipidus**

Lesson 14 : **Understanding Hyperthyroidism and Graves Disease**
