About the course Ankle Brachial Pressure Index

Ankle Brachial Pressure course, in this course we will explore Ankle Brachial Pressure, a key clinical test used to assess peripheral arterial disease (PAD) and determine the risk of cardiovascular events. Exploring its principles, measurement techniques, and interpretation of results, we'll delve into its diagnostic utility in identifying arterial occlusive disease and assessing vascular health. Additionally, we'll discuss the significance of ankle brachial pressure in guiding treatment decisions and improving patient outcomes. Understanding ankle brachial pressure is essential for healthcare professionals involved in cardiovascular risk assessment and management.

Medical Category's Courses

Course Lesson(8)

Lesson 1 : **Understanding The Dexamethasone Suppression Test**

Lesson 2 : **Understanding ECG Axis and Axis Deviation**

Lesson 3 : **Understanding Ankle Brachial Pressure Index ABPI in Peripheral Vascular Disease**

Lesson 4 : **Understanding the Short Synacthen Test**

Lesson 5 : **Understanding Hyponatraemia**

Lesson 6 : **Understanding Infertility Causes and Investigations**

Lesson 7 : **Understanding Hepatitis B Serology Results**

Lesson 8 : **Understanding Arterial Blood Gases**
