Mindluster Platform

About the course Ruby coding high level

Ruby on Rails is a server-side (back-end) web application framework that has been written in Ruby. It's a model-view-controller framework that provides default database, web page, and web service structures.

Programming Category's Courses

Course Lesson(74)

Lesson 1 : **Learn Ruby on Rails from Scratch**

Lesson 2 : **What is the Ruby on Rails Framework**

Lesson 3 : **How to Install Rails on a PC**

Lesson 4 : **How to install Rails on a Mac**

Lesson 5 : **Creating a new Rails application from scratch**

Lesson 6 : **Ruby on Rails configuration options**

Lesson 7 : **How to run a Ruby on Rails application**

Lesson 8 : **List of database rake tasks in a Rails application**

Lesson 9 : **Using sublime text for a Rails project**

Lesson 10 : **Comprehensive Rails file system guide part 1 of 2**

Lesson 11 : **Comprehensive Rails file system guide part 2 of 2**

Lesson 12 : **Scaffolds vs Other generators in Rails**

Lesson 13 : **Rails scaffold generator guide**

Lesson 14 : **What do scaffolds create in Rails**

Lesson 15 : **Introduction to the Rails console**

Lesson 16 : **Creating records in the Rails console**

Lesson 17 : **Using the Rails console to update and delete database records**

Lesson 18 : **Advanced queries in the Rails console**

Lesson 19 : **Introduction to routing in Rails**

Lesson 20 : **RESTful Routing in Rails**

Lesson 21 : **Create custom controller actions in Rails**

Lesson 22 : **Custom routes for pages in a Rails application**

Lesson 23 : **Configuring a home page in a Rails app**

Lesson 24 : **Setting up custom redirects in a Rails application**

Lesson 25 : **Rails application layout file overview**

Lesson 26 : **How to use partials in Rails**

Lesson 27 : **Advanced ERB tips**

Lesson 28 : **How to add images to a Rails application**

Lesson 29 : **Using CSS styles with the Rails asset pipeline**

Lesson 30 : **Using web safe fonts in a Rails application**

Lesson 31 : **Integrating custom fonts into a Rails application**

Lesson 32 : **What s the purpose of Controllers in Rails**

Lesson 33 : **Working with controller methods in Rails**

Lesson 34 : **Controller antipatterns in Rails**

Lesson 35 : **Using custom queries in Rails controllers**

Lesson 36 : **Purpose of model files in Rails**

Lesson 37 : **Creating custom model files in a Rails Application**

Lesson 38 : **Custom scopes in model files in a Rails application**

Lesson 39 : **Setting defaults in a Rails application**

Lesson 40 : **How to integrate validations in Ruby on Rails**

Lesson 41 : **Generating a model in Rails**

Lesson 42 : **Setting up database associations in Rails**

Lesson 43 : **Add additional columns to a Rails mode with migrations**

Lesson 44 : **Integrating advanced callbacks in Rails**

Lesson 45 : **Adding columns to a database table in Rails with migrations**

Lesson 46 : **Changing columns in a database table with migrations in Rails**

Lesson 47 : **Removing a column from a database using migrations in Rails**

Lesson 48 : **What are Ruby gems**

Lesson 49 : **How to add gems to a Gemfile in Ruby on Rails**

Lesson 50 : **Securing API credentials in a Rails project**

Lesson 51 : **How to create a file uploader in rails with carrierwave**

Lesson 52 : **Connecting to AWS with the Fog Ruby gem**

Lesson 53 : **Using the Rails controller generator**

Lesson 54 : **Integrating CRUD functionality into Rails controllers**

Lesson 55 : **Adding private methods to Rails controllers**

Lesson 56 : **Creating nested routes in Rails**

Lesson 57 : **Setting up a nested form in Rails**

Lesson 58 : **Saving values in the backend of a nested resource in Rails**

Lesson 59 : **Configuring redirect routes for nested resources in Rails**

Lesson 60 : **How to add custom arguments to links in Ruby on Rails**

Lesson 61 : **Integrating multiple queries on a single page in Rails**

Lesson 62 : **Integrating conditionals into view pages**

Lesson 63 : **Finalizing file uploads and performing debugging in Rails**

Lesson 64 : **Installing devise for authentication in a Rails app**

Lesson 65 : **Creating a Devise user model in Rails**

Lesson 66 : **Testing registration and signing into a Rails application**

Lesson 67 : **Integrating the current user method in Rails**

Lesson 68 : **Allowing users to edit their account with Rails**

Lesson 69 : **Overview of Rails deployment options**

Lesson 70 : **Heroku deployment requirements for Rails apps**

Lesson 71 : **Using git with a Rails project and pushing to Github**

Lesson 72 : **Deploying a Rails application to Heroku**

Lesson 73 : **How to access the rails console on Heroku**

Lesson 74 : **Ruby on Rails Course Summary**
