About the course Scurvy Symptoms and Treatment

Scurvy Symptoms course, in this course we will delve into the various symptoms of scurvy, a condition caused by vitamin C deficiency. Participants will explore manifestations such as swollen, bleeding gums, fatigue, joint pain, skin lesions, and easy bruising. Through case studies and clinical insights, learners will understand the underlying pathophysiology, diagnostic considerations, and treatment options for scurvy. By recognizing and addressing scurvy symptoms effectively, healthcare professionals can improve patient outcomes and prevent complications associated with this nutritional deficiency disorder.
