Mindluster Platform

About the course Python Scripting Basics

A Python script is a collection of commands in a file designed to be executed like a program. The file can of course contain functions and import various modules, but the idea is that it will be run or executed from the command line or from within a Python interactive shell to perform a specific task .

Programming Category's Courses

Course Lesson(5)

Lesson 1 : **Installation and Lists | Python Scripting Basics | Part 1 | Eduonix**
