Mindluster Platform

About the course Professional Angular Core Directives

At the core, a directive is a function that executes whenever the Angular compiler finds it in the DOM. Angular directives are used to extend the power of the HTML by giving it new syntax. Each directive has a name â€” either one from the Angular predefined like ng-repeat , or a custom one which can be called anything.

Programming Category's Courses

Course Lesson(3)

Lesson 1 : **Angular| Core Directives Part 1 3 |Eduonix**

Lesson 2 : **Angular | Core Directives Part 2 3 | Eduonix**

Lesson 3 : **Angular| Core Directives Part 3 3 | Eduonix**
