About the course Cardiac Tamponade Symptoms and Diagnosis

Cardiac Tamponade Symptoms course, in this course we will learn about the symptoms and clinical manifestations of cardiac tamponade. Topics will include the pathophysiology of cardiac tamponade, common causes, and diagnostic techniques. Participants will explore the signs and symptoms such as hypotension, tachycardia, dyspnea, and pulsus paradoxus. Through case studies and interactive discussions, learners will develop the skills to recognize and manage cardiac tamponade effectively in clinical settings.
