About the course Hypermagnesemia Symptoms and Treatment

Hypermagnesemia Symptoms course, in this course we will explore the signs and symptoms of hypermagnesemia, a condition characterized by abnormally high levels of magnesium in the blood. Participants will learn about the clinical manifestations of hypermagnesemia, including muscle weakness, lethargy, confusion, and cardiac abnormalities. Through case studies and interactive discussions, learners will develop the skills to recognize, assess, and manage hypermagnesemia effectively in clinical settings, aiming to improve patient outcomes and prevent complications associated with this electrolyte imbalance.

Medical Category's Courses

Course Lesson(36)

Lesson 1 : **Carbohydrate Structure and Metabolism an Overview Animation**

Lesson 2 : **Lipid Fat Metabolism Overview Animation**

Lesson 3 : **Protein Metabolism Overview Animation**

Lesson 4 : **Cholesterol Metabolism LDL HDL and other Lipoproteins Animation**

Lesson 5 : **Unsaturated vs Saturated vs Trans Fats Animation**

Lesson 6 : **High Cholesterol and Familial Hypercholesterolemia Animation**

Lesson 7 : **The Brain s Hunger Satiety Pathways and Obesity Animation**

Lesson 8 : **Intermittent Fasting How it Works Animation**

Lesson 9 : **Gluten and Gluten Related Disorders Animation**

Lesson 10 : **Metabolic Syndrome Animation**

Lesson 11 : **Diabetes mellitus Symptoms Complication Pathology of Type 1 and Type 2 Animation**

Lesson 12 : **How Unhealthy Lifestyle Can Cause Prediabetes and Diabetes Animation**

Lesson 13 : **Gestational Diabetes Animation**

Lesson 14 : **Diabetes Type 1 and Type 2 Animation**

Lesson 15 : **Diabetic Ketoacidosis DKA Pathophysiology Animation**

Lesson 16 : **Hyperosmolar Hyperglycemic State Diabetic HHS vs DKA Animation**

Lesson 17 : **Kidney Homeostatic Functions Animation**

Lesson 18 : **Water and Sodium Balance Hypernatremia and Hyponatremia Animation**

Lesson 19 : **Acid Base Balance Animation**

Lesson 20 : **Acidosis Respiratory and Metabolic Animation**

Lesson 21 : **Alkalosis Respiratory and Metabolic Animation**

Lesson 22 : **Arterial Blood Gas ABG Test Animation**

Lesson 23 : **The Endocrine System Overview Animation**

Lesson 24 : **Thyroid Gland Hormones and Thyroid Problems Animation**

Lesson 25 : **Hypothalamus and Pituitary Gland Functions Animation**

Lesson 26 : **Physiology Basics the Digestive System Animation**

Lesson 27 : **Hypocalcemia Low Calcium Pathology Causes Symptoms and Treatment Animation**

Lesson 28 : **Hypercalcemia Too Much Calcium Animation**

Lesson 29 : **Hypokalemia Causes Symptoms Effects on the Heart Pathophysiology Animation**

Lesson 30 : **Hyperkalemia Causes Effects on the Heart Pathophysiology Treatment Animation**

Lesson 31 : **Magnesium Metabolism and Hypomagnesemia Animation**

Lesson 32 :
Hypermagnesemia Causes Pathophysiology Symptoms Diagnosis and Treatment Animation

Lesson 33 : **Dumping Syndrome Animation**

Lesson 34 : **Bile Pathways and the Enterohepatic Circulation Animation**

Lesson 35 : **Cushing Syndrome Animation**

Lesson 36 :
Gout Pathophysiology Causes Symptoms Risk Factors Diagnosis and Treatments Animation
