Mindluster Platform

About the course Assembly Programming

In computer programming an assembly is a runtime unit consisting of types and other resources. All types in an assembly have the same version number. Often, one assembly has only one namespace and is used by one program. But it can span over several namespaces. Also, one namespace can spread over several assemblies.

Programming Category's Courses

Course Lesson(44)

Lesson 1 : **Project Setup Assembly Programming**

Lesson 2 : **Example File Code Structure Assembly Programming**

Lesson 3 : **Comments Assembly Programming**

Lesson 4 : **Memory Segments Assembly Programming**

Lesson 5 : **Data Registers Assembly Programming**

Lesson 6 : **Processor Registers Assembly Programming**

Lesson 7 : **Pointer Registers Assembly Programming**

Lesson 8 : **Index Registers Assembly Programming**

Lesson 9 : **Control Registers Assembly Programming**

Lesson 10 : **Immediate Addressing Mode Assembly Programming**

Lesson 11 : **Register Addressing Assembly Programming**

Lesson 12 : **Direct Offset Addressing Assembly Programming**

Lesson 13 : **Direct Memory Addressing Mode Assembly Programming**

Lesson 14 : **Indirect Memory Addressing Mode Assembly Programming**

Lesson 15 : **MOV Instruction Assembly Programming**

Lesson 16 : **Allocating Storage Space for Initialised Data Assembly Programming**

Lesson 17 : **Multiple Variable Definitions Assembly Programming**

Lesson 18 : **Allocating Storage Space for Uninitialized Data Assembly Programming**

Lesson 19 : **Multiple Variable Initializations Assembly Programming**

Lesson 20 : **EQU Command Assembly Programming**

Lesson 21 : **Assign Command Assembly Programming**

Lesson 22 : **Define Command Assembly Programming**

Lesson 23 : **Increment Command INC Assembly Programming**

Lesson 24 : **Decrement Command DEC Assembly Programming**

Lesson 25 : **Subtraction Command SUB Assembly Programming**

Lesson 26 : **Addition Command ADD Assembly Programming**

Lesson 27 : **Multiply Command MUL IMUL Assembly Programming**

Lesson 28 : **Divide Command DIV IDIV Assembly Programming**

Lesson 29 : **AND Instruction Assembly Programming**

Lesson 30 : **OR Instruction Assembly Programming**

Lesson 31 : **NOT Instruction Assembly Programming**

Lesson 32 : **XOR Instruction Assembly Programming**

Lesson 33 : **Compare Instruction CMP Assembly Programming**

Lesson 34 : **Unconditional Jump Assembly Programming**

Lesson 35 : **Conditional Jump Assembly Programming**

Lesson 36 : **ASCII System Assembly Programming**

Lesson 37 : **Basic Function Assembly Programming**

Lesson 38 : **Stacks Data Structure Assembly Programming**

Lesson 39 : **Function To Print A Number Assembly Programming**

Lesson 40 : **Recursion Using Factorial Assembly Programming**

Lesson 41 : **Strings Assembly Programming**

Lesson 42 : **Loops Assembly Programming**

Lesson 43 : **Macros Assembly Programming**

Lesson 44 : **System Calls Assembly Programming**
