Mindluster Platform

About the course Python getpass Module

The getpass module provides a platform-independent way to enter a password in a command-line program, as Example 2-25 shows. getpass(prompt) prints the prompt string, switches off keyboard echo, and reads a password. If the prompt argument is omitted, it prints " Password: â€œ.

Programming Category's Courses

Course Lesson(2)

Lesson 1 : **Python getpass 01 Get User**

Lesson 2 : **Python getpass 02 Get Password**
