About the course Astigmatism Types and Treatment

Astigmatism Types course, in this course we will delve into the various types of astigmatism, a common refractive error affecting vision. We'll explore the distinctions between regular and irregular astigmatism, discussing their causes, symptoms, and diagnostic methods. Through detailed explanations and visual aids, students will gain an understanding of how corneal irregularities and changes in lens curvature contribute to astigmatism. Additionally, we'll examine treatment options, including corrective lenses, refractive surgery, and therapeutic interventions tailored to each type of astigmatism. By the end of the course, participants will be equipped with the knowledge to identify and manage different forms of astigmatism effectively.

Medical Category's Courses

Course Lesson(13)

Lesson 1 : **Vision Anatomy and Physiology Animation**

Lesson 2 : **Eye Anatomy and Common Defects Animated Simple Tutorial**

Lesson 3 : **The Near Response of the Eye and Presbyopia Animation**

Lesson 4 : **Astigmatism Types Causes Symptoms and Treatment Options Animation**

Lesson 5 : **LASIK or PRK Which is right for me Animation**

Lesson 6 : **Eye Floaters and Flashes Animation**

Lesson 7 : **Cataract and Cataract Surgery Animation**

Lesson 8 : **Retinopathy Diabetic and Hypertensive Animation**

Lesson 9 : **Macular Edema Animation**

Lesson 10 : **Development of Glaucoma Animation Open Angle vs Angle Closure Glaucoma**

Lesson 11 : **Trabeculectomy Surgery for Glaucoma Animation**

Lesson 12 : **Laser Trabeculoplasty for Glaucoma ALT vs SLT Animation**

Lesson 13 : **Canaloplasty Procedure for Glaucoma Animation**
