Mindluster Platform

About the course TypeScript beginner

The TypeScript language uses the same syntax and semantics as the JavaScript language. There are a few differences that makes it easier to write scalable code. As a result, you can use your existing JavaScript .

Programming Category's Courses

Course Lesson(25)

Lesson 1 : **00 TypeScript Course Please Learn TypeScript**

Lesson 2 : **01 TypeScript Course Why we need TypeScript**

Lesson 3 : **02 TypeScript Course TypeScript Compiler**

Lesson 4 : **03 TypeScript Course Define types**

Lesson 5 : **04 TypeScript Course type Inference**

Lesson 6 : **05 TypeScript Course tsconfig explained**

Lesson 7 : **06 TypeScript Course using npm init**

Lesson 8 : **07 TypeScript Course generate types file**

Lesson 9 : **08 TypeScript Course Number type**

Lesson 10 : **09 TypeScript Course number vs Number**

Lesson 11 : **10 TypeScript Course undefined vs null**

Lesson 12 : **11 TypeScript Course never vs void type**

Lesson 13 : **12 TypeScript Course enum type**

Lesson 14 : **13 TypeScript Course object type**

Lesson 15 : **14 TypeScript Course array and tuple type**

Lesson 16 : **15 TypeScript Course union type**

Lesson 17 : **16 TypeScript Course type alias vs interface**

Lesson 18 : **17 TypeScript Course Optional properties Non null Assertion**

Lesson 19 : **18 TypeScript Course class with typescript**

Lesson 20 : **19 TypeScript Course Access Modifiers and getter setter**

Lesson 21 : **20 TypeScript Course readonly vs static property**

Lesson 22 : **21 TypeScript Course interface in typescript**

Lesson 23 : **22 TypeScript Course generics in typescript**

Lesson 24 : **23 TypeScript Course generics constraints**

Lesson 25 : **TypeScript Full Beginner Course**
