Mindluster Platform

About the course AJAX Polling

Polling is a standard technique used by the vast majority of AJAX applications. The basic idea is that the client repeatedly polls (or requests) a server for data. The client makes a request and waits for the server to respond with data. If no data is available, an empty response is returned .

Programming Category's Courses

Course Lesson(2)

Lesson 1 : **AJAX Polling Checking A State**

Lesson 2 : **AJAX Polling Infinite**
