Mindluster Platform

About the course Framework for Lambda API Gateway

You can create a web API with an HTTP endpoint for your Lambda function by using Amazon API Gateway. API Gateway provides tools for creating and documenting web APIs that route HTTP requests to Lambda functions. You can secure access to your API with authentication and authorization controls.

Programming Category's Courses

Course Lesson(20)

Lesson 1 : **Serverless Framework Introduction 01**

Lesson 2 : **Serverless Vs Server Based Applications 02**

Lesson 3 : **Serverless Framework Introduction and CLI Setup 03**

Lesson 4 : **Serverless Setup Demo 04**

Lesson 5 : **Serverless CLI commands and deployment 05**

Lesson 6 : **Serverless Configuration 06**

Lesson 7 : **Serverless Multiple Handlers 07**

Lesson 8 : **Serverless Lambda Roles and Permissions 08**

Lesson 9 : **Serverless Offline testing and deployment 09**

Lesson 10 : **Serverless Full Stack Application with Dynamo DB 12**

Lesson 11 : **Serverless Application Offline with Dynamo DB 13**

Lesson 12 : **Serverless REST APIs with Dynamo DB 14**

Lesson 13 : **Serverless App with Mongo DB 15**

Lesson 14 : **Serverless App with Mongo DB 16**

Lesson 15 : **Serverless App with S3 PutObject 17**

Lesson 16 : **Understanding Lambda trigger 18**

Lesson 17 : **Different use case of lambda with S3 SQS SNS 19**

Lesson 18 : **AWS serverless S3 thumbnail generator 20**

Lesson 19 : **AWS Serverless with SNS 21**

Lesson 20 : **AWS serverless with SQS Send and Receive Lambda 22**
