Mindluster Platform

About the course Node JS with Graphql World

GraphQL queries themselves are not faster than REST queries, but because you can pick the fields you want to query, GraphQL requests will always be smaller and more efficient. This is unlike REST, where additional data is often returned, even when that data isn't vital or necessary.

Programming Category's Courses

Course Lesson(24)

Lesson 1 : **Graphql Tools and Different Libraries 01**

Lesson 2 : **Graphql Course Introduction 02**

Lesson 3 : **Basic Graphql Setup using Yoga Graphql 03**

Lesson 4 : **Building First Graphql APIs 04**

Lesson 5 : **Creating TypeDef and Resolvers for Graphql 05**

Lesson 6 : **Creating Queries with Mock Data 06**

Lesson 7 : **Accessing Query Arguments Graphql 07**

Lesson 8 : **Re structuring Folder with resolvers and schema 08**

Lesson 9 : **Creating Mutations for user and posts Entity 09**

Lesson 10 : **Using Context Arg for Data source Graohql 10**

Lesson 11 : **Graphql Testing Mutations using client 11**

Lesson 12 : **creating subscription and testing subscriptions 12**

Lesson 13 : **Graphql Subscription Example 13**

Lesson 14 : **Graphql Series Agenda 14**

Lesson 15 : **Using Graphql Client with Apollo to Consume APIs 15**

Lesson 16 : **React App Integration with Apollo Graphql Client 16**

Lesson 17 : **React App adding Queries Mutation with Apollo Graphql Client 17**

Lesson 18 : **React App with useQuery and useMutation hooks 18**

Lesson 19 : **React App Demo with Subscriptions Query Mutations 19**

Lesson 20 : **Yoga graphql with Mongo DB Mongoose 20**

Lesson 21 : **Yoga graphql with MongoDB adding types 21**

Lesson 22 : **Yoga graphql with MongoDB adding resolvers 22**

Lesson 23 : **Yoga graphql with Mongoose adding resolvers 2 23**

Lesson 24 : **Yoga Graphql with Mongo DB Application Demo Query Mutations 24**
