About the course Radial Nerve Palsy Symptoms

Radial Nerve Palsy course, in this course we will learn about Radial Nerve Palsy, a condition characterized by dysfunction or damage to the radial nerve, leading to motor and sensory deficits in the arm and hand. Participants will explore the anatomy, etiology, and clinical manifestations of radial nerve palsy. Additionally, diagnostic evaluation methods, conservative and surgical management options, as well as rehabilitation strategies, will be discussed to facilitate comprehensive care for individuals affected by radial nerve palsy. This course aims to equip healthcare professionals with the knowledge and skills necessary to effectively diagnose, treat, and manage radial nerve palsy, thereby optimizing patient outcomes and quality of life.
