About the course ADHD Symptoms In Adults or Children

ADHD Symptoms course, in this course we'll delve into the signs and symptoms associated with Attention-Deficit/Hyperactivity Disorder (ADHD). Participants will learn to recognize common indicators such as inattention, hyperactivity, impulsivity, disorganization, and difficulty sustaining focus. We'll discuss the impact of ADHD on academic, social, and occupational functioning, as well as its prevalence across the lifespan. Through case studies and discussions, learners will gain insights into identifying and managing ADHD symptoms effectively, facilitating early intervention and improved outcomes for individuals with ADHD.
