Mindluster Platform

About the course Making Predictions with Data and Python

Predictive analytics is the process of using data analytics to make predictions based on data. This process uses data along with analysis, statistics, and machine learning techniques to create a predictive model for forecasting future events.

Programming Category's Courses

Course Lesson(6)

Lesson 1 : **Making Predictions with Data and Python The Course Overview | packtpub com**

Lesson 2 : **Making Predictions with Data and Python Plotting with Matplotlib | packtpub com**

Lesson 3 : **Making Predictions with Data and Python What Is Predictive Analytics | packtpub com**

Lesson 4 : **Making Predictions with Data and Python scikit learn | packtpub com**

Lesson 5 : **Making Predictions with Data and Python Logistic Regression | packtpub com**

Lesson 6 : **Making Predictions with Data and Python Predicting Credit Card Default | packtpub com**
