Mindluster Platform

About the course Orchestration with Docker

Tools to manage, scale, and maintain containerized applications are called orchestrators, and the most common examples of these are Kubernetes and Docker Swarm. Development environment deployments of both of these orchestrators are provided by Docker Desktop .

Programming Category's Courses

Course Lesson(4)

Lesson 1 : **Dive into Orchestration with Docker Swarm The Course Overview | packtpub com**

Lesson 2 : **Dive into Orchestration with Docker Swarm Initializing a Swarm | packtpub com**

Lesson 3 : **Dive into Orchestration with Docker Swarm Adding a Service | packtpub com**

Lesson 4 :
Dive into Orchestration with Docker Swarm Introduction to Docker Compose | packtpub com
