About the course Acute Lymphoblastic Leukemia treatment

Acute Lymphoblastic Leukemia course, in this course we will learn about the characteristics, diagnosis, and treatment options for Acute Lymphoblastic Leukemia (ALL). Exploring its pathology, genetic factors, and risk stratification, participants will delve into chemotherapy regimens, targeted therapies, and stem cell transplantation. With a focus on multidisciplinary approaches and supportive care, this course equips learners with the knowledge to effectively manage ALL across various patient populations, including pediatric and adult cases.
